

March 1<sup>st</sup>, 2007, 7pm-9pm  
LGI Room, Lower Gwynedd Elementary  
571 Houston Road, Ambler, PA 19002-3553

H&SA is hosting a presentation on Lyme Disease – “What each parent/caretaker, individual and educator should know about Lyme Disease, and other Tick-borne Diseases”

### Did you know that...

- South Eastern PA has one of the highest infection rates in the country? And that this rate is growing each year??
  - most victims do not recall a tick bite??
- children are the most likely victims of Lyme and that Lyme can change your child’s personality, IQ, and quality of life??
  - many children with Lyme are misdiagnosed with ADD, autism, hyperactivity, allergies, behavioral issues, MS, etc.??
- Lyme symptoms can come and go, and that most victims appear to be quite healthy and normal to “outsiders”??

Come find out what you need to know to prevent and recognize Lyme disease EARLY when it is easiest to treat and cure. This presentation is being given by a Philadelphia Magazine “Top Doc”, Dr. B. Steven Burke, MD who has been treating Lyme disease patients and conducting clinical research studies for many years, along with Douglas Fearn, President of the SEPA Lyme Disease Association. We will also have a few families that have been affected by Lyme disease share their stories.

We will have door prizes, free pamphlets and other goodies – come and get informed! If you have any questions, please email [juliafwagner@aol.com](mailto:juliafwagner@aol.com), or call 215-699-6975.
