

Helpful Hints in Addition to Recycling for Residents/Waste Management:

When planning to dine out, bring reusable and recyclable containers to package up all leftovers. The containers can be washed and reused many times. In doing so, you avoid having the restaurant use Styrofoam, non-recyclable aluminum tins, saran wrap or aluminum foil.

Keep a cloth bag with several reusable containers in your car at all times and bring with you to the dining establishment or to your get together. This practice is easy and very environmentally friendly!
