Fees of Professional Consultants. The Township shall be reimbursed for the charges of its Solicitor, Engineer, Planner or other professional consultant in connection with any land use matter. The Township also requires a Professional Services Agreement (PSA) with associated fees to be paid by anyone wishing to meet with and discuss potential land use items with any of the professional consultants prior to the filing of a formal application.

Escrow Costs. A cash escrow is required in order to guarantee payment of:

- The services of the Township Engineer, as provided in the Subdivision and Land Development Regulations, being Title Four of the Planning and Zoning Code, plus all costs for other engineering and professional certification as deemed necessary.
- The services of the Township Solicitor for legal services incidental to the preliminary and final approval of plans of each subdivision or development, or section thereof, and specifically including, but not limited to, the review of all plans, correspondence and permits; the preparation of subdivision and escrow agreements, easements, covenants and deeds; the attendance at any meetings with the Board of Supervisors, the Planning Commission, the Township Engineer, the developer or the developer's representatives in connection with the development; and any telephone conferences in connection with any of the above. The same expectation is maintained for the services rendered by the Township Engineer and the Township Planner/Zoning Officer and any other professional land use consultant in conjunction with a subdivision or land development.
- The actual costs of all drainage, water and/or material tests.
- Legal fees, advertising and other costs involved in the dedication of streets and public improvements to the Township.
- The administrative costs of processing subdivision and land development escrow account release request as follows: 10% of the total amount of every escrow release request of less than \$500 and in the amount of \$50 for every escrow release request in excess of \$500. Such charge shall be due and payable at the time as any escrow release is submitted to the Township for processing.
- The costs set forth in this subsection shall be estimated and escrowed at 10% of the total construction cost of the public improvements required to be built under the improvement construction plan (s) of the final plans, unless in the judgment of the Township Engineer a greater amount is necessary to secure the payment of the expenses which the Township is likely to incur in connection with the subdivision. Such estimate shall be escrowed with the Township in cash and shall be placed, by the Township, in an interest-bearing account with the interest accruing for the benefit of the developer. The Township may draw upon the escrow as necessary to reimburse itself for the fees and costs set forth in this subsection. Simultaneously with each such draw from the escrow by the Township, the Township shall send the developer an invoice (marked "paid") for the amount drawn, specifying the particular fee, cost or expense for which the Township has drawn payment for reimbursement. The developer shall at no time permit the cash escrow required by this subsection to be reduced below an amount reasonably estimated by the Township Engineer to be necessary to reimburse the Township for the

remaining fees, costs and expenses which the Township is reasonably likely to incur prior to the completion of the subdivision or land development. Within 10 days of the developer’s receipt of notice from the Township that the balance of the escrow required by this subsection is deemed inadequate to cover the reasonable costs and expenses likely to be incurred by the Township, the developer shall post such additional moneys as have been specified in the notice. Subject to the dispute resolution procedure set forth in the Pennsylvania Municipalities Planning Code, as amended, the refusal to post such moneys as shall be requested by the Township shall be deemed a breach of the developer’s obligations under the improvement agreement and shall entitle the Township to withhold any requested inspections or permits until such time as the escrow has been increased as requested by the Township.
